Drip Coffee Brewers - *Bunn ITCB*

The Bunn ICTB offers high volume coffee and tea brewing in a single unit.

Things we love:

- Brews coffee and tea on the same machine
- Single can run on 110v or 220v power
- High volume
- Communicates with MHG grinder to ensure correct brew profile is used
- Highly customizable brew recipes

Room for improvement:

- Does not fit under most cabinets
- Outdated interface

[See it in action!]
